* Intro *

1, 2, 3, listen

All the thing you wanted for me
and all the things i gave to you
you took advantage of the best i had
the disadvantage comes back to you
im tierd of the same old story
were always trying to work things out
im sick of all the conversater

this cant hold me down

bridge:

here we go your styling up a fight
baby this aint right
messin with my appertite
aint gonna make me nice

chorus:

telling me this, telling me how
telling me straight, all the things that i shoulda done
making it how,not making it right
for making it sound as if you now what im all about
telling me will, telling me why, telling me lies
i always have to compramise
ive taking enough, im giving you up
tearing me up, cos you dunno know what im all about

dont like the way you play
i dont like your attitude
never know if im here to stay
now its time to change gonna make the move
no more of the same old stories
its time i let my feelings out
to long youve ignored me
i should let you go

bridge:

here we go your styling up a fight
baby this aint right
messin with my appertite
aint gonna make me nice

chorus:

telling me this, telling me how
telling me straight, all the things that i shoulda done
making it how,not making it right
for making it sound as if you now what im all about
telling me will, telling me why, telling me lies
i always have to compramise
ive taking enough, im giving you up
tearing me up, cos you dunno know what im all about

becos its all about the in and out
the time the place that you choose
you see its all a game
and it needs to change
cos baby this wont do

chorus:

telling me this, telling me how
telling me straight, all the things that i shoulda done
making it how,not making it right
for making it sound as if you now what im all about
telling me will, telling me why, telling me lies
i always have to compramise
ive taking enough, im giving you up
tearing me up, cos you dunno know what im all about
(repeat)

* intro out *

1, 2 ,3 du doo
