I try to tell myself that, I'll never fall in love  
Besides its obvious that we're really much to young  
So much for feeling nothing, cause somethings in my  
heart  
For you, and I know its true

When I close my eyes, I picture you  
When you're by my side, I run from you  
So I know I can't deny, that somethings going down  
with you

Why cant everything I think of, feels like its all about  
you  
Why cant everytime I dream I only dream of you  
Theres something going down in my heart right now  
Theres something going down with you and I know  
I know that you feel it, baby I know. I know that you feel  
me too

Oooh Oooh Ahh Yeah huah Oooh

When I be hanging with my girlfriends and you walk  
into the room  
They say that you were such a fly boy, they think that  
you are so cute  
But I say you're not my style they say I'm in denial, one  
look into my eyes  
And you'll break me down  
When you're not around I look for you  
When you come around, I play it cool  
Don't know why I try to hide when I know its going down  
with you

Why cant everything I think of, feels like its all about  
you  
Why cant everytime I dream, I only dream of you  
Theres something going down in my heart right now  
Theres something going down with you and I know  
I know that you feel it, baby I know, I know that you feel  
me too

I don't really wanna feel this way but I know don't think I  
can run away but I need  
To diside boy I just cant hide they way I feel about you,  
The sun goes down when you're next to me, suns going  
down  
I can bearylly breath

Why cant everything I think of, feels like its all about  
you  
Why cant everytime I dream, I only dream of you  
Theres something going down in my heart right now  
Theres something going down with you and I know  
I know that you feel it, baby I know, I know that you feel  
me too

Why cant everything I think of, feels like its all about  
you  
Why cant everytime I dream, I only dream of you  
Theres something going down in my heart right now  
Theres something going down with you and I know  
I know that you feel it, baby I know, I know that you feel  
me too

Why cant everything I think of, feels like its all about  
you  
Why cant everytime I dream, I only dream of you  
Theres something going down in my heart right now  
Theres something going down with you and I know
