One of those things
One of a kind
Believe me when I say I want to keep
This day forever
I can't see how our lives will change
This moment to remember
Good times sad times
These are the things that mean so much
A gentle love that we can share oh yeah
The kind that you can touch when you feel undecided
Just whisper the word
And I will be there
One of those things
One of a kind
The love that we're feeling
Is always on my mind
You had to ask the question
Oh how can I be sure this time
What kind of future lies in wait
How many mountains to climb
Good times bad times
These are the things we share together
Just whisper the word
And I will be there
The kind that you can touch
When you feel undecided
Just whisper the word
And I will be there (I will be there)
And I will be there
