Life, arise  
Exceed existence with burning eyes  
Believe, break free  
Illusions of boundaries and mortality  
Into eternity

You are not alone, you are not alone

Forever in this life, we sail the sea of stars  
We ride the winds of light, across the cosmic night

My mind, blazing bright  
Eternal life in frozen lattices of light  
I feel, I see  
Order in chaos and destiny  
Into eternity

You are not alone, you are not alone

Forever in this life, we sail the sea of stars  
We ride the winds of light, across the cosmic night

Firstborn, first free  
Freed from matter, beyond all life  
Into eternity

You are not alone... you are not alone

Forever in this life, we sail the sea of stars  
We ride the winds of light, across the cosmic night
