Earth to your brain

Yo, yo, yo, yo

Yo, yo, Houston I think we have a problem

Yo, yo, I think we have a problem

Yo, yo, we have a problem

Yo, yo

[Kelis]

Days, you know those days

When everyone seems to aggravate you

Unfazed, fucked up ways

Don't try to ignore, you know that it's true

See you say to yourself that you really don't wanna deal

And this day to day action on Earth just don't appeal

You know how hard you try

You've been known to take so much

They shoot at you cause you're fine

Bite the bullet I know that it sucks

If security's thin then faith will pull you through

If you still angry follow me

And do what I do

Do you hear what I'm talking 'bout?

Do you hear we can conquer the world?

Got this whole world running from

This love between a boy and a girl

They're afraid of this chemistry

Plus the speed of light of laser guns

They go \*laser sounds\*

To the light in every one

There you want some friends

Seems like everybody has friends

Depends on what you call friends

You don't really care you just want one

It's a person full of feelings but nobody's there

But you have to ask yourself if they were

Would they really care?

They do bullshit some times

They do the things that you've done  
They're people just like you  
But tell me do you want one  
98 percent of faith won't follow through  
Don't you know real magic comes from the other two?

Do you hear what I'm talking 'bout?  
Do you hear we can conquer the world?  
Got this whole world running from  
This love between a boy and a girl  
They're afraid of this chemistry  
Plus the speed of light of laser guns  
They go \*laser sounds\*  
To the light in every one

Do you hear what I'm talking 'bout?  
Do you hear we can conquer the world?  
Got this whole world running from  
This love between a boy and a girl  
They're afraid of this chemistry  
Plus the speed of light of laser guns  
They go \*laser sounds\*  
To the light in every one

It was last week we were watching TV  
My boyfriend wanted to watch channel three  
Then he started to freak  
The news flash came on then  
So I said hey, my popcorn's burning  
Hey, why is the channel turning?  
Hey, that was NASA what did they want  
Hey, yo just pass the blunt  
I was so high that I didn't realize what they said  
Plus my eye vision fried  
If it's not then it's messing with my head  
Hey, you can't be serious  
Hey, but I need my contacts  
Hey, float and spin  
Hey, so I turned and I said, shit

Do you hear what they talking 'bout?  
About to send your black ass to Mars  
That's exactly what I'm talkin' bout  
Money, science, space, and mars  
Till someday you got that million  
Just because you've been hanging with stars  
Wake up, wake up, wake up, wake up  
And send your black ass to Mars

Do you hear what I'm talking 'bout?  
Do you hear we can conquer the world?

Got this whole world running from  
This love between a boy and a girl  
They're afraid of this chemistry  
Plus the speed of light of laser guns  
They go \*laser sounds\*  
To the light in every one
