In a town far from the city
Was a girl just a child
She grew up to a beautiful dream

And she walked like a queen
When she walked down the street
All the men turned around
To see her high heels

She walked like a queen
When she walked down the street
All the men turn around
To see her go on

Jealousy wasn't a stranger
Everywhere she would be
So she cried for someone to help

I wanna know is anybody gonna
help me when I'm down
I wanna know will anybody really
help me when I'm down

She walks like a queen
When she walks down that street
All the men turn around
To see her high heels
She walks like a queen
When she walks down that street
All the men turn around
To see her high heels

I wanna know is...
I wanna know will...

She walks like...

And at last a fire was burning
As a man held her hand
And held her warm
