Livin on the run is all I've ever known
One day here and the next day gone
Girl watcha gonna do when I don't run away with you
When you finally realize that I'm just passin through
Just passin through I'm passin through
Well I just rode in and I'm gone like the wind
I'm just passin through

I try to understand you're out lookin for a man
But you're fightin em off just as hard as you can
Girl watcha gonna do when I don't run away with you
And you finally realize that I'm just passin through
Just passin through I'm passin through
Well I just rode in and I'm gone like the wind
I'm just passin through

I gotta get away you gonna try to make me stay
But if you're love will set me free then I'll be back
someday
You thought you had me figured out but you didn't
have a clue
And you finally realized that I'm just passin through
Just passin through I'm passin through
Well I just rode in and I'm gone like the wind
I'm just passin through

Well I aint gonna stay no matter what you say
I'm just passin through
