It's no good to lose heart, it's no good to lose sight  
It's no good to have nowhere to go that feels right  
You trust me on that one, you sure shouldn't try it  
And you sure shouldn't let yourself get right inside it

If I could be you, I'd be happy with that  
My regrets would be few and my future not black  
Yeah, I could be happy with that

It's no good to get numb, it's no good to get tight  
It's no good to wake up and then find you're alright  
No, you don't get off easy, well you can't escape it  
You wouldn't believe just how long you can take it

If I could be you, I'd be happy with that  
My regrets would be few and my future not black  
Yeah, I could be happy with that

Sometimes life can be hard when you give love  
And no one will take it

If I could be you, I'd be happy with that  
My regrets would be few and my future not black  
For a minute or two, walk in some other shoes  
Yeah, I could be happy with that
