I see you standing there from across the room.
All the faces fade away, It's just me and you.
It's getting much too late and I can hardly stand,
To watch you hesitate. Come on, I got a plan for you.

Gotta get you up against the wall, (whoa)
Someone's gonna have to take the fall and I know that
it's you.
Need to get you up against the wall, (whoa)
Against the Wall.

So turn the music up, infect your brain.
I wanna take you there. You'll never be the same.
So let's go to the back of the room for one final dance,
This night could last forever or burn right through our
hands.

Gotta get you up against the wall (whoa)
Someone's gonna have to take the fall and I know that
it's you.
Need to get you up against the wall (whoa)
Against the Wall

Take me. Leave me, wake me, I'm dreaming
Make you, Break you, I'll make you, I'll save you x 2
It's what you want, It's what you need
It's part of you It's part of me
I'm what you want. I'm what you need
I'm everything. It's what you see.

Gotta get you up against the wall (whoa)
Someone's gonna have to take the fall and I know that
it's you.
Need to get you up against the wall (whoa)
Against the Wall x 2
