"Into The Night"

Visit "[Into The Night](#)" on MotoLyrics.com

She always seems to throw away
Everything you feel inside
Away into the night she rides, she hides her lies

If she learns to sing a different song
Everyone just goes along
But they always seem to fade away now

All we need, all we see now

Chorus
She's falling asleep, I'm falling apart
From the words that she speaks, cuts right through my
Heart

Don't make this harder than it needs to be
For sleep won't come, until I'm free

We never seem to recognize
Faces that we hold inside
But they never seem to fade away now

All we need, is all we see now

Chorus

I can't be there waiting
It makes me so nervous
Anxious and low

Chorus

My sleep won't come
