As my mind drift and then split
Like the middle of a spliff, I begin to catapult off
The cliff of the unknown
I got a feeling in my funny bone that we're not the
same
Just ask? of another age
My soul fly with the carefree
Words to the wise, a spoke a hundred times like a gold
d
Haha Imfao
I hate y'all but I spread love like mayo
That's bread slugs
My brain matter is a brain fatter
See, my vision on my vision will stare at ya
This is the future if I say so, you copping fitted caps
I'm about to cop a halo
I mean it, and I play football with mars
And marbles with pluto and venus
Witness the genius, I enter rap with the inner-city
feelings
That enters your system like a computer hack
Then you die...
