I need to be brilliant, electric  
I want it to be natural  
This life should be fantastic

Let's start a revolution  
A true revolution  
I haven't felt the same  
Since I arrived I haven't slept a wink

I'm just a man fading  
I've been a little bit jaded  
Everybody wants to get on  
The neon lights have got it all

I'm living out sensation  
Walk inside invasions  
Nobody wants to really know  
The neon lights have got it all, the neon lights

I need to be elected, perfected  
Needs beyond the blue  
Feel the satisfaction

I want to be a light source  
A blaring night force  
I haven't felt the same  
Since I arrived I haven't slept a wink

And this is how it starts  
Before we lose it all  
I know we're not coming  
God knows when I'm gone

I'm just a man fading  
I've been a little bit jaded  
Everybody wants to get on  
The neon lights have got it all

I'm living out sensation  
Walk inside invasions  
Nobody wants to really know  
The neon lights have got it all, the neon lights

Well, this is how it starts  
Before we lose it all  
I know we're not coming  
God knows when I'm gone

I'm just a man fading  
I've been a little bit jaded  
Everybody wants to get on  
The neon lights have got it all

I'm living out sensation  
Walk inside invasions  
Nobody wants to really know  
The neon lights have got it all

I'm just a man fading  
I've been a little bit jaded  
Everybody wants to get on  
The neon lights have got it all

I'm living out sensation  
Walk inside invasions  
Nobody wants to really know  
The neon lights have got it all, the neon lights
