### "Don't Stop"

Visit "[Don't Stop](#)" on [MotoLyrics.com](http://MotoLyrics.com)

There's a light that shines our way  
A light that leads un everyday  
If we would only pay attention

We could open up our hearts  
We could make a brand new start  
We can find a new direction

Maybe it's all just in the stars  
Who will be and who are  
But Baby I can't help believing

If you want to help yourself  
Look inside and nowhere else  
Learn to love the life you're leading

Don't stop, get on top  
Give it all, all you've got  
Everybody's got to keep on pushin'  
Don't stop, get on top  
Take a little, give a lot  
Everybody's got to keep on pushin'

Time is moving much too fast  
What was now is now the past  
Still I know it's now or never

Life is hard I understand  
Every woman every man  
We've got to work it out together

Maybe it's never gonna change  
And everything will stay the same  
But baby I can't help believing

Nothing happens by itself  
It's up to you and noone else  
To reach inside and start the healing
