With Rab Howat

I need some help on this long dark night
I need someone to see me right
Cause'one to one I'll tell you now
I've been loving you, loving you too long

You gave it up, not a backward glance
No compromise, no second chance
And now It's time to do what's right
I've been loving you, loving you too long

I've been loving you too long
And this will be your last song
Thought our love was so strong
But now I know, know you're gone

I know it hurts to see the light
The truth shines through, strong and bright
And so goodbye, to you tonight
I've been loving you, loving you too long
Yes I was loving you, loving you too long.
