You think you took her from me but I just gave her to  
you  
I never wanted her much anyway all I ever wanted to do  
Kiss her lips in the early morn hold her hands while the  
babies were born  
Take her off hurt when she got sick get off from work  
and come home quick  
To be at home with her every night to love her for the  
rest of my life  
Give her anything her heart desired make sure that I  
never got too tired  
To let her know I loved her so just let her go  
I never wanted her much anyway all I ever wanted to do

Was ease her mind when she felt blue never never be  
untrue

I never wanted her much you can see all I ever wanted  
to do  
Kiss her lips in the early morn...  
Kiss her lips in the early morn...
