Hey lady, let me kick it to you first  
You know I've come to realize  
There's more to life than just  
A hit and run

And I'm hanging up all that  
You know what I'm saying  
'Cause you mean more to me  
Than anything, anything in this world, check it out

Well, well, well, you know this man can tell  
Exactly what you want, baby and how you want it, oh  
girl  
Hey, hey, hey, your love takes me away  
I'll be your provider, lady, your lover and fighter, oh girl

No need to conceal what you feel  
'Cause I'm the real deal  
So don't fight it, can't deny it  
Girl, with you I want to chill

I just wanna chill always and forever  
No time to kill  
So now until always and forever  
Ain't no time to kill forever and ever and ever

Well, well, well, God bless the day we fell  
Into each others arms, baby and shared the magic  
Hey, my love is here to stay, yes  
I'm burning with desire, baby, let me light your fire

Don't you ever spare  
'Cause you know I do it so well  
So don't fight it, can't deny it  
Girl, with you I wanna chill

I'm just wanna chill always and forever  
No time to kill  
So now until always and forever  
Ain't no time to kill forever and ever and ever and ever

Oh, you blow my mind, got me loving

Ooh, all the time your blowing my mind  
Girl, you look so fine, you got me wanting you  
All the time you look so fine and

So lay back, relax and just chill  
'Cause there ain't no time to kill  
My love will never do you wrong  
'Cause you and I belong

Ooh, me and you  
You and me  
Just loving me endlessly  
I don't wanna get over

You and me  
Me and you  
Endlessly, eternally  
I don't wanna get off over, oh yes

I just wanna chill always and forever  
No time to kill  
So now until always and forever  
Ain't no time to kill forever and ever and ever

I just wanna chill, always and forever  
No time to kill  
So now until always and forever  
Ain't no time to kill forever and ever and ever

I just wanna chill, always and forever  
No time to kill
