[1]

I call destiny, by the moon in the dark of the night  
I scream angrily, for a chance to plead your plight  
I cry remorsefully, to the stars within my sight  
I feel desperately, it wasn't fair nor was it right

[2]

Then the wind, the rain and the hail  
All came crashing down  
The balme, the pain and the shame  
All came around

[3]

Face to face with love...images  
Turn your back on above...images  
We walk hand in hand...images  
It's all teh masters plan...images  
Images of the past

[4]

We will never forget, my mind is clear  
Time goes ever so fast, images of the past

[repeat 3]

[repeat 2]

We will never forget, my mind is clear

[5]

I couldn't endlessly, all ways to make us whole  
We hold eternity, in our hearts and in our souls  
I shake violently, with the thought that I've been told  
We stand gallantly, for the love that we still hold
