I look in the mirror to see a face I do not know  
I see inside the man, to his fears and beliefs  
Once more to start again, I'd live another way  
Take me from the sorrow and take me from grief

I sense the resolution - Race with time  
To my own execution - Race with time  
It's the final solution - Race with time  
To end my revolution

Yesterday seems like a long lost friend  
No need to worry so far from the end  
Life wakes me up so painfully, all I see is misery  
If I could do it over again, I'd live my life differently  
Yesterday seems like my only friend  
Tomorrow brings me closer to the end

Race with time, race with time  
It's the final solution - Race with time  
To end my revolution - Race with time

I sense the resolution - Race with time  
To my own execution - Race with time  
It's the final solution - Race with time  
To end my revolution

Yesterday screams, to come back for more  
The future awaits, with the answers in store  
Hold me and tell me that all will be again  
If not in this life, then on the other side  
The road goes forward, where does it end  
If it's not me, who will decide

Race with time  
We're all racing - Race with time  
I sense the resolution - Race with time  
To end my revolution - Race with time
