[1]

I call destiny, by the moon in the dark of the night
I scream angerly, for a chance to plead your plight
I cry remorsefully, to the stars within my sight
I feel desperately, it wasn't fair nor was it right

[2]

Then the wind, the rain and the hail
All came crashing down
The balme, the pain and the shame
All came around

[3]

Face to face with love...images
Turn your back on above...images
We walk hand in hand...images

It's all teh masters plan...images
Images of the past

[4]

We will never forget, my mind is clear
Time goes ever so fast, images of the past
[repeat 3]

[repeat 2]

We will never forget, my mind is clear

[5]

I couldn't endlessly, all ways to make us whole
We hold eternity, in our hearts and in our souls
I shake violently, with the thought that I've been told
We stand gallantly, for the love that we still hold
