"Run With You"

Let alone the breath of wind that you're bringing
It's to the chords of your guitar that I'm singing
It hits me when I hear them say
That today is just an ordinary day

My dizzy heart has never warned me from showing
That when you're not around, my world keeps on going
But here and now, I can't deny
It's been a while and not a single day goes by

I wanna run with you
Wanna feel the sun with you
I want it all again with you

It's not the life that I was hoping to borrow
I know that you and I, we got no tomorrow
It breaks me when I hear them say
That today is just an ordinary day

I wanna run with you
Wanna feel the sun with you
I want it all again with you

I wanna run with you
Wanna feel the sun with you
I want it all again with you

I wanna run with you
Wanna feel the sun with you
I want it all again with you
