Spent an awful lot of time making tunes and making  
rhymes

Things that other people do, yeah

From this heap of words and rhyme

I never really gave much time to something just for  
you, yeah

Oh gemini child you know I love you

I don't really have to tell you

Cause you know damn well that I do

Anyway it's not so much what I say as

What I do for you girl

So here's a song that I thought of long ago

That really comes from you, yeah

Gemini child, you make life come alive

Suddenly there's so much loving to share with you

And I do gemini child, you make life come alive

Suddenly there's so much loving to share with you

And I do oh gemini child you know I love you

I don't really have to tell you

Cause you know damn well that I do
