It don't make any difference to me
What the world thinks about us, baby
'Cause in my heart, I will always believe

That we were meant for each other
Love ain't got no color
It don't make any difference to me
What they see, yeah yeah

All you gotta do is look at me
Three generations of my family, you see
People treat you different when you're in between

He was black and she was white
You know that both people thought that it wasn't right
I can still remember what she used to say

It don't make any difference to me
What the world thinks about us, baby
'Cause in my heart I will always believe

That we were meant for each other
Love ain't got no color
It don't make any difference to me

And every time I look at you deep in your brown eyes
I see what you're going through
The streets are different when you're in between

And I can feel it everyday, the whispers, the words
They don't think that I hear them say
Before you let a tear fall, remember girl

It don't make any difference to me
What the world thinks about us, baby
'Cause in my heart I will always believe

That we were meant for each other
Love ain't got no color
It don't make any difference to me
What they see, no

Maybe people might change but I really don't think they
will

I know, you know it and baby we can run away
But then we'd be running from fame
Do you know it? Do you know? Do you know?

And baby I'm telling you now
Don't you ever look down
Don't you ever look down again
'Cause remember girl

It don't make any difference to me
What the world thinks about us, baby
'Cause in my heart I will always believe

That we were meant for each other
Love ain't got no color
It don't make any difference to me

It don't make any difference to me
What the world thinks about us, baby
'Cause in my heart I will always believe

That we were meant for each other
Love ain't got no color
It don't make any difference to me
What they see
