Take away my heart and take me into to you
Take back my forced smiles and take me back to you
Let me get inside and let me tell you me

Before I take too long let me figure this out
Before I turn my head, I don't doubt
When I walk outside I'm as empty as you feel
When I walk inside I feel with you

Could you find a place in your heart?
And with that place take hold of my hand
You could walk right beside me
And lay down with me in the sand

Before I take too long let me figure this out
Before I turn my head, I don't doubt
When I walk outside I'm as empty as you feel
When I walk inside I feel with you

I'd use words but I'm speechless
I'd use my hands but I'm numb
I'd think about it but what's to think about With you
upside down?

You said would you get up
I waited for you to help me
I'm waiting for you to help me

Before I take too long let me figure this out
Before I turn my head, I don't doubt
When I walk outside I'm as empty as you feel
When I walk inside I feel with you
I feel with you
I feel with you
I feel with you
