

## Celestial Season "Jupiter"

Visit "[Jupiter](#)" on MotoLyrics.com

Last night I went to Jupiter  
and silently I stayed  
until I caught the daybreak on the seventh moon  
breathing in the juvenile  
naked to the bone  
sitting on the bottom of my soul

Open up to the sound on Celestials playground

I'm reaching out to willpower

staring at the strobe  
I never thought that speed of life could kill my thoughts  
trying to come clear now  
my engine running slow  
falling like a comet heading home

Open up to this sound  
let the magic come over  
and freak out
