Sucked in a downward spiral
By an aware denial
To fulfill desires
Of a foreclosed mind

A prison with no windows
With bars that don't let see through
Strict codes you gotta stick to
Admission free for all folks

As a plan to make
A system break
Welcome to this new

Free freed freedom for you
Every opinion true

A strange new world order
With no selection of the fittest
No perspective to get better
But this flag of living freer
Someone tell me what's the meaning
Of this freedom to be stupid
As individualistic beings
Crafted by this free society

As a plan to make
A system break
Welcome to this new

Free freed freedom for you
Every opinion true
No more facts too
Reality renewed

I don't feel right

Because this is a lie (this is a lie)
I don't feel right
Because this kills your mind (your mind)
I don't feel right
Because it's just desire (just desire)

I don't feel right
Because this is a waste for my life

A prison with no windows
With bars that don't let see through
Strict codes you gotta stick to
Admission free for all folks
As a plan to make a system break
Welcome to this new free freed freedom

When truth becomes illusion
Religion of relativism
Creates a bogus vision
Of self-centric situations
Always needing some attention
Looking for some comprehension
That's the paradox of living
This new model that's been given

As a plan to make
A system break
Welcome to this new

Free freed freedom for you
Every opinion true
No more facts too
Reality renewed
