The weight of words cracks your back again playback
repeat lets cut that ribbon / you could never runaway
arizona fly away / trashcan summers watch them
overflow the laughs the cries never let you go/ time to
turn the page of age arizona fly away / let go of the
things that bind you open up the the things you're blind
to move on creat an atmophere unlock what defines
you learn from what's behind you keep in thouch and
please don't disappear / tonights perfect don't wake up
the sun from kusk till dawn everyday you're gone / take
a chance and runaway arizona flyaway/let go of the
things that bind you open up to thihe things you're
blind to move on create an atmosphere unlock what
defines you learn from what's behind you keep in touch
and please don't disappear / on the verge of an
earhquake spit off your rubix cube mix them up and
make somthing new experiment you can alwysredefine
/ let go of the things that bind you open up to the things
you're blind to move on create an atmosphere unlock
what defines you learn from what's behind you keep in
touch and please don't disappear.
