I just got that heartbreaking feeling
Like i lost a friend
And it hurts more than you understand
Can we forget or even just pretend?
And if i could i would stop the clock
Relive my past we'd start again

[chorus]
I want you
(i need you)
So let's bring down these walls
My life is so incomplete without you

And if things are never the same
If it blows up in my face
I'll scream out loud "i'm so so sorry" to everybody
Our regrets we can't erase
And if i could i would stop the clock
Relive my past we'd start again

[chorus]
I want you
(i need you)
So let's bring down these walls
My life is so incomplete without you

Why am i so stupid?
I'm down on bended knee
Say you'll forgive me
You are my addiction
Can you hear the sound of my heart beating?

(i want you)

[chorus]
I want you
(i need you)
So let's bring down these walls
My life is so incomplete without you
