[Verse 1:]

Falling in a dark hole that never ends
Because I lost a friend
Missing you is like a road that never seems
To get you to your destination

[B-Sec:]

I've been looking but I can't find you
Where did you go ? What was my mistake
I've been trying retrace my steps
To get back to you for my life's sake

[Chorus:]

It's been so long since I heard from you
So long ? what did I do
It's been so long since I felt your touch
So long ? you avaieth much

[Verse 2:]

If you drop a needle in a haystack
Is it really worth trying to find
Picking through each straw because I never thought
I would be so lost without you

[Bridge:]

Everyday I long for a chance to be with you again
For with failing I cry that I'm sorry for pushing you away
I would do anything to rekindle our being
I'm lost without your presence
It's been so long ? I'm wondering will I feel you again
