On this couch you took my hand
And made me part of all your plans
And I've got your ring as my proof
Well what I'm really waiting for
Is when you let me cross your door
And we're together under one roof
Then baby I'll darn your socks and cook for you
Whatever you say that's what I'll do
The honeymoon will last for ever
You and I in love together
I'll have you you'll have me
You'll have me and I'll have you
And baby
We'll have each other
This is what a girl dreams of
One guy to bless her life with love
And then you brought that blessing to me
I'm going to make you proud you did
Someday I'll bless your life with kids
We'll have such a lovely family
And baby I'll darn your socks and cook for you

Whatever you say that's what I'll do

The honeymoon will last for ever

You and I in love together

I'll have you you'll have me

You'll have me and I'll have you

And baby

We'll have each other

I'll have you you'll have me

You'll have me and I'll have you

And baby

We'll have each other

I'll have you you'll have me

You'll have me and I'll have you

And baby

We'll have each other

I'll have you you'll have me

You'll have me and I'll have you

And baby

We'll have each other
