Scourge of lies that jealousy breeds  
A plague-like human virus you're a breathing disease  
Reap or sow - harvest your hate - life is like a figure of  
eight

You cast first stone as your glass house grows,  
Vicious circles in your vast deep below  
Poisoned tongue - retaliate - life is like a figure of eight

Divide, control, conquered domain  
The bitch that bred this monster must be on heat again  
Broken glass reflections true  
Pearls turn to rust - diamonds to dust

As black as coal, It's your silicon soul  
Plastic people should not play with fire  
Karma kills - traitors and fakes - life is like figure of  
eight

A small world, Reap as you sow  
Harvest your hate, Like a figure of eight

Scourge, a disease, jealousy the plague it breeds  
Eyes, insecure blind, vicious circle of lies
