on that cowboy in the sky
with all the freedom of a madman
was that shining carnival
carousel that took me under
in one fell blow

hit the planes down
tear the sky out
hit the planes down
in one fell blow

/--someone needs to figure out this line---/
attached by hinges to the ceiling
where the cheek bone shadows fall

upon a face it took me under
my fears box glow

hit the planes down
tear the sky out
hit the planes down
in one fell blow
