I believe in the sand beneath my toes
Nobody knows
Nobody knows

I believe that everything is free
Try just to help me breath
Nothing is ever the same
Whos left to blame
Were all the same
The people that fight for our name
That is your reasoning

I believe in the sand beneath my toes
Nobody knows
Nobody knows

I believe that everything is free
Try just to help me breath
Nothing is ever the same
Whos left to blame
Were all the same
The people that fight for our name
That is your reasoning

(Oh oh oh oh.)

Oh my god she's back again
The music made her happy and
She's hold'n hands
She brought a friend
Forever she's a dancer

What the hecks an attitude?
She's dancing and her face is nude
She twirls her dress like fancy food
Forever she's a dancer

Watch her move and dance to the music
Make your move and dance with her do it
The more that you do
Baby that's the more you stay true

Get down deep in love
Angel sent from up above
(Oh she knows, oh she knows it now)
Fall over ocean side fighting just to stay alive
(Oh she knows, oh she knows it now)
I believe in stars
I believe in sky
THE MORE YOU KNOW
THE LESS YOU KNOW
The more you try

So believe in the music
It will take you right threw it

(Oh oh oh oh.)

Oh my god she's back again
The music made her happy and
She's hold'n hands
She brought a friend
Forever she's a dancer

What the hecks an attitude?
She's dancing and her face is nude
She twirls her dress like fancy food
Forever she's a dancer

Watch her move and dance to the music
Make your move and dance with her do it
The more that you do
Baby that's the more you stay true

Yo it's the tick-tock rippen
I make the beets that go
I got the synthesizer glistening in every note
Yo hope floats
(Ucker what?)
You know we turn it on
Like lights of a dawn
I be sip'n perignon
Now scream
You know we bout to dream
We got the beets bumping
So you know we wana lean
Figure it out baby
You know this music is crazy
Ain't no lazy hazy baby
The lazy will never phase me
Drip it out
