Cold Inside

This world, crumbles down, before us, it withers away,
so cold, inside, its time, to let, it go/

Verse: my emotions flood out of me, bursting from
within

Let the floodgates go, im internally suffering
Shattered fragments go ballistic, inside of me
Sordid ameba is a status, im soon to be

Chorus: broken down depressed i kept it all in my chest
I, I am so cold inside
Deluded Concerned another Lesson Learned

Verse: This burning rage infuriates, decapitates my
senseless meaning
My seams have ripped, iÂ've lost my grip trip

And fall iÂ've lost it all, to become an atomosphere
iÂ've been torn from my eyes to realise i was wasted
oppression

Chorus

Torrents flow through me
Blackened crystals form around my heart
Enclosed on darkened walls
My meaningless screams echo inside

Verse: Manacles wrap me up, in a maternal love
A prisoner ina, melanchonic simulacrum
Greyscale vision is the future, a funeral scene
Propoganda pollution, chokes me violently

Chorus
