

Kill The Conversation

"Fold"

Visit "[Fold](#)" on MotoLyrics.com

Destruction of our helpless being

Predatory black holes ingest
All matter into it's vortex
Not even light can escape
Crushed into oblivion's fate
All light all objects merge as one
Unity of the universe has begun
Life doesn't stand a chance
Time has expired humanity can't advance

Separation of the atom has begun

Anti matter and matter co exist
Causing deterioration of physics
No laws to govern routine
Time to restart from clean

Time has expired
Nowhere implodes
Causing the expansion
Of a new abode

Time and structure begin to form
Healing the fabric of space that was torn

This is not a minor disturbance
This is a catastrophe
There is nowhere to evacuate
Everything is falling away
