Questions that we need to know
That you'll never find
It's the only way to be
Now you've settled down
Settled down to find another way

Answers that you wanna find
That you'll need to love
If you wanna find the time
Now we've settled down
Settled down to find another way

By now I should have been something more than you

You look worn out
More and more and more each day

You look worn out
More and more each day
Can I listen?
Listen anymore
You don't notice
You don't notice anymore
And I'm scared to tell you
Scared to tell you why

Someday they're gonna come for you
They're gonna hunt you down
It's the only way to prove
That you've settled down
Settled down to find another way
