-one plus one doesnt equal two it equals me alone
without you. the other one can stand for you and all the
things you said we'd do. it can stand in place of where
you used to be. i thought you said you were there for
me. i know changes happen when i'm gone but i didnt
think you'd totally move on. next time can you do as
promised? or is that too much for you to be honest? i
lived your life of make believe. i wonder what you've
achieved? i guess i was wrong to put my trust in you. if i
dont say goodbye today i never will. i wish you could
have waited for me. cant you please just wait for me?
never doesnt have to start today. cant we go back to
yesterday? i never wanted to push you into anything.
remember the words you used to sing/ remember the
words you used to sing?
