[Killah Priest] From being led thru the desert naked and desperate for water The Lord is my Sheppard, destined for order But we are his sheeple Protect us from the wolves or lector tryna do us evil Never read the Bible for survival All I know is rivals grab rifles Despiteful, or disciples are God work I read Proverbs, for knowledge I starve and thirst Deal with the sun and the moon, and the stars a third On the curb puffing herb Nah I puff a verse, get drunk off this word I observe spiritual things; I've seen Israel in my dreams Come true as I succumb to, in a lesson what a blessing Learned from Timbuktu, or King Tut's tomb In the Just schools, from the Noah to the three sons This the reason, Shem, Ham, and Japheth Now open up the tablets the origins from Shem Peleg, I look in the mirror everyday Look at ya self; this is what the artist had felt Solomon dies, his kingdom splits One tribe take to the sea in ships The other say near Egypt, occupy the land Till their grand's had grand's While on the other hand The one who said self have a new plan Forgot the old way of the Lord, the Covenant The other children grew up in it To 70 AD the reign of Titus advance crew ships invaded with the army Weapons and navies, killing women and babies Causing Solomon's offspring to flee deeper into Africa After the massacre, they went to Zimbabwe and Mozambique Seen an ocean fleet that cause commotion on their beats Where the Roman Priest held us across, lives were lost That's after the divine force, they quickly desperado to Morocco Where they developed other God gold, also when Allah rose Check my bar flows Were they shocked when Solomon's children shot 'em and killed 'em Lots of 'em pilgrims Fought millions of miles under storm clouds Where they met these peoples calling themselves Indians Never reminisce, look at each other eyes and forgot when Prophecies from old, remember you was told From the voices of the scrolls, lost souls
