Serial clonation, laboratory becomes the uterus  
Nature violation, the dawn of genetic holocaust  
New born babies crying their first and their last tears  
Killed by their fathers, eliminated as a failed  
experiment

Biolypse, synthetic generation  
Biolypse, artificial selection

Biological weapons, stealth army, massive killings  
Infectious warfare, eradication is developed by  
scientists  
Altered spores, modified virus to spread death  
Massive infection, human race ruled by germs

Biolypse, synthetic generation  
Biolypse, artificial selection  
Biolypse, humanity is forgotten  
Biolypse, mother nature is rotten

Killing the weak ones to purify the race  
Scientists have blood on their hands

Innocents falling to make real the dream  
Of those ones who stand in the throne

Legions of virus created to destroy  
Indiscriminate carnage begins

Desolation  
The only thing left in the earth
