Will you walk from what we've got
Will you walk from what we've got?
Will you walk from what we've got
Will you walk from what we've got?

Walk through the long dry grass, past the trees and
then on past
..all the places we have been before
Through the tracks the sheep have made, past the dam
and into the shade
..you can see the other towns from here.

Will you walk from what we've got
Will you walk from what we've got?
Will you walk from what we've got
Will you walk from what we've got?
And as you walk back down, know that's where you
wanna be found,
..it always makes you feel that way
As you wonder why these things sometimes pass us by
..so would you throw it all away?

Will you walk from what we've got
Will you walk from what we've got?
Will you walk from what we've got
Will you walk from what we've got?
I say
Will you walk from what we've got
Will you walk from what we've got?
Will you walk from what we've got
Will you walk from what we've got?
