### "Last Departure"

drowning in the sunset's lullaby  
sleeping in the womb of the firefly  
floating in a sequence frozen still  
the liquid reaper moves in for the kill

standing by the shore  
last departure cannot wait no more  
(soon to close it's doors)  
a farewell in gray  
see all the lost ones now march away  
(serpentine parade)

the end of forever  
the last wave of the cosmic sea  
manifestation of the never  
a last sting of the honey bee

floating in a sequence frozens still  
the liquid reaper moves in for the kill  
fall to breath inside my hollow shell  
felt no sorrow as the curtain fell
