i can't comprehend society's movement.  
the regression of human existence.  
this is the quest of life.  
fulfill your destiny. slow down.

slow down this fast paced world, and you will see past  
the illusion.  
breaking the foundation, collapse the control.  
building a revolution to heal nations. it starts within you.

building a revolution to heal nations. it starts within you.
