Frank Sinatra

Walkin' lonely streets, lookin' for a sign
Livin' lonely dreams, life with no design
Like lonely people do, livin' in the past
Only findin' love that didn't last

Then the shadows of my life felt the sun and saw your
face

As your love fell all around me making perfect time
and space

Then you turned my world around
When you held out your hand
You turned my world around
Bringin' love to a lonely man

Now I walk with you
Spring has come at last
No more lonely dreams, they're all in the past
And each day knows the joy that sharing love can give
Love's the only life that we can live

Now the shadows of my life feel the sun, I see your
face

As your love falls all around me making perfect time
and space

And you turned my world around
When you held out your hand
You turned my world around
Bringing love to a lonely man
