Can I love you, just for a little bit in your arms  
If you leave me alone and leave, you know how much I  
will hurt inside  
I love you, let's start again, even through all the hard  
times we had  
I love my friend  
It can only be you, our love was planned as fate from  
the beginning\*  
With the tears that you shed during hard times, now I  
will pay it all back  
What makes me happy is your smile, and I am placing  
it in my heart

Repeat

Just like in this moment, I love you, let's start again  
Even through the hard times  
I love my friend  
It can only be you, help make you forget and just make  
you happy
