"Cryptosporidium"

Visit "[Cryptosporidium](#)" on MotoLyrics.com

Septicemia, yersinia pestis
Delusional hyponatremia
H2O poisoning without knowing
Tap water infects my throat

Nausea, retching
Pallor bowel movements
Epigastric discomfort
Consume water from the sink

Trying to rehydrate myself
Virulent liquid maggots produce
Rapid progressive condition
Instant depletion of body fluids

Electrolyte balance precarious
Secretion of intestinal polypeptide
Dilation of blood vessels
Asiatic cholera secreting fluid and salt

In the intestinal tract, viremia, vipoma
Water born epidemic
Confusion in thought
Intestinal rot, bacterial fate

Trying to rehydrate
Leading to hypovolemia
Chronic renal dysfunction
Massive loss of potassium

Ion K from diarrhea and vomiting
Reaching for the stash tray
Load a bowl, fire it up
Trying to control nausea

Internal anal hemorrhaging
Bleeding sphincter
And constantly wiping
Lying in pain slowly dying

Wandering in disbelief
Yearning at the terror inside me

Cramping in, unbearable, I want to cry
Somehow this has to end

Same bacteria eats my friends
Drink pepto-bismal to remiss
Smoke a joint to progress
Pale and pink acid vomit sprays

Dizziness erupts, I slip away
Immune system starts to fade
A fight with time
Antibiotics will save my life

Cryptosporidium, killing inside
Burning and churning, intestines writhe
I am still breathing but barely alive
Parasites dying, I come back to life

Cheating death, smoke another bowl
Regaining hope, bless my soul
The body is gaining strength
No more bloody stool, I hit the bong

Eating to constipate
Hoping I won't defecate
Water epidemic deploys town
A defective filter is what was found

At the water treatment plant
Intake, outtake valves
Were somehow crossed
Sending untreated sewage

Into the home, community infected
Cryptosporidium infecting my body
Living to tell the this purulent story
Smoking some kind and feeling alive
