Boy and girl always seen the sun  
All those years, together as one  
So afraid, things I should've done  
But now I see angels on the ??

By the time I realized I was blinded all those years  
For your sun light was hurting my eyes  
I should've run up to you, and tell you how I feel  
I should've kissed you a thousand times

Memories captured in a frame  
Why did we never see the flame?  
Where you?  
I'm calling out your name

By the time I realized I was blinded all those years  
For your sun light was hurting my eyes  
I should've run up to you, and tell you how I feel  
I should've kissed you a thousand times

I wish I kissed you a hundred thousand million times  
and more

Now that I've realized I'm not blinded anymore  
For your sun light has open my eyes  
I'm gonna run up to you and tell you how I feel  
I'm gonna kissed you a thousand times

Now that I've realized I'm not blinded anymore  
For your sun light has open my eyes  
I'm gonna run up to you and tell you how I feel  
I'm gonna kissed you a thousand times

Kissed you  
A thousand times
