Scan in the daylight to find out the morning star  
In the twilight that holds your dreams lost by far

He's out there to haunt you  
He holds your dreams within your head  
When nightmare surrounds you  
You scream but no-one's here

[Chorus:]  
In the dark-screaming in the dark  
An endless maze that surrounds you  
In the dark-screaming in the dark  
Till your voice is faint  
And nightmare come to haunt you

Welcome to your nightmare in the land of the  
condemned  
Die-die in your dream and you will be forever dead

He lurks in the shadows  
You hear his claws slashing through the air  
Don't beg him for mercy  
He'll cut you down

Lost horizon-lost in mind and your nightmare is still  
around you  
Lost horizon-lost in daylight and your nightmare still  
attacks  
Lost horizon-lost in mind see his claws being still  
behind you  
Los horizon-lost in dark feel your voice modified to  
screams
