U got me like a junkie does
I need some pick up baby
Heaven needs
Your pick up baby yeah
Get out of your faces
We're all on the good stuff
It's not what you make it
It's where do we get some more
Was it alright
Your chemical lovebite
When Friday night explodes

I need you like an addict needs
I need some pick up baby
Hypnotise those
Lasers in your eyes
Get out of your faces
We're all on the good stuff
It's not what you make it
It's where do we get some more
Was it alright
Your chemical lovebite
When Friday night explodes
Get out of your faces now
Out of your faces now
Out of your faces now
