You and me, could start as we  
Somewhere connects me  
Out there, it lets me

Here we are, white lights in your eyes  
Fucks me over, it takes me always into space

White lights, all right, coming with you  
White lights, all right, coming with you  
Hold tight I might be fucking with you

Your eyes excite me  
White lies ignite me  
White lies invite me  
Alive, i'm always into space

White lights, all right, coming with you  
White lights, all right, coming with you  
Hold tight I might be fucking with you

Fucking with you  
Fucking with you  
Fucking with you

You and me,  
Forgot to be  
Beautiful people  
At least we're always into space
