Whatever made you want me
Another ghost I swear you are
Whatever made you haunt me
An oh so close
An oh so far
And I will feel like you
And always breathe like you

Be always
It's you and me forever
Be always
We'll suffocate each other

Whatever happened to us
I love the ghost that you've become
Whatever cut right through us
My lover knows true love dies young
I will bleed for you
I'll always bleed for you

Be always
It's you and me forever
Be always
We'll suffocate each other

Be always
It's you and me forever
Be always
We'll suffocate each other

Whatever made you haunt me
