Look around, what do you see  
Wounded lovers in retreat  
Two by two, they're carried away  
Never to admit their defeat

Drop your guard and your weapons  
We all need someone to love

Girl, we'll fight our battles side by side  
'Cause girl, only the strong will survive  
They will survive

Keep your eyes turned toward mine  
And you won't see the shadows  
Of lonely days and lonely nights  
Where there are no tomorrows

There's no need to run and hide girl  
We all need someone to love

Girl, we'll fight our battles side by side  
'Cause girl, only the strong will survive  
They will survive

Drop your guard and your weapons  
We all need someone to love

Girl, we'll fight our battles side by side  
'Cause girl, only the strong will survive  
They will survive  
...We will survive
